SAFETY CAMERA SPECIALLY DESIGNED FOR HEAVY EQUIPMENT

Safety is becoming an ever increasing aspect in the industry.

Blind spots to the front and rear of heavy equipment are the most dangerous areas. Accidents caused by maneuvering, can be large unplanned expenses for a business. A camera system will dramatically reduce these costs.

Concrete trucks backing up often can be very dangerous and cause injury to citizens & workers nearby. A Track-Vision camera reduces operator blind spots and protects you better against a fatality.

When backing up a wheel loader in a quarry or around a crushing plant. Many operators confirmed the lack of visibility behind them, even using their mirrors.

Mining trucks backing up in the blasted area can avoid sharp rocks damaging tires, thus saving thousands of dollars in new tires.

Other applications of cameras are used for precision work. As an example, an excavator operator using a camera on the dipper stick looking at the digging area when visibility is difficult, becomes very handy.

Demolition applications with an excavator using a concrete pulverizer at the end of the dipper stick, gives the operator a better understanding of the structure to be torn down.

Applications

Trackvision is available for Heavy equipment like:

Wheel loaders · Backhoe · Excavators · Articulated haulers · Scraper haulers · Motor graders · Mining equipment · Pavers · Demolition equipment · Crushing & screening plant · and more...

FEATURES AND BENEFITS

All adjustments are made directly from the **easily installed monitor.** The camera can be set to turn on automatically when backing up and then shut off when the operator shifts into drive. The camera can be left on at all times if necessary.

Nitrogen-filled, 100% watertight

Heated lens surface to prevent condensation or frost

115° wide-angle viewing

"sees" better in the dark than a human eye!

Shockproof and vibration-resistant

100% watertight & waperproof enclosure

integrated sun cover

Monitor brightness automatically adjusts to the amount of day light

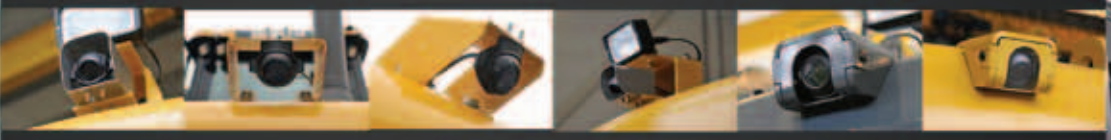

Easy install in cab with bracket

3+2 PREMIUM WARRANTY

Designed to Last

A standard installation includes one heavy-duty camera mounted on the back of the vehicle and a 7" color flat screen LCD installed in the cab. **Additional cameras can also be added to increase visibility around the vehicle.** Track-Vision is the new generation of on-board safety camera for heavy equipment. Each component has been tested to endure the most severe vibration, dust and temperature fluctuations over years of usage. The camera is also highly accurate in extreme low-light conditions. In fact, it "sees" better in the dark than a human eye! TrackVision is covered by the best warranty with *3 years parts warranty on the camera and 2 years on the monitor.*

TRV-1000-1-115 Track-Vision™ Safety Camera Complete Kit

The kit includes:

- 1 LCD (7" Color flat screen) with 4 meters (13') Cable
- 1 Heavy Duty color camera
- Cable Assembly - 16 meters (52')
- Bracket and Harness Assembly

OPTIONAL Optional cameras allow you to install up to 4 cameras on the same monitor!

TRV-1000-2-115*	2nd Track-Vision™ Color Camera
TRV-1000-3-115†	3rd Track-Vision™ Color Camera
TRV-1000-4-115†	4th Track-Vision™ Color Camera

*Including: Cameras with cables and Multi-Cam switcher
†Including: Camera with cable

TRV-402320
Camera protective hood cover

NEW: TRV4080 Wireless Camera options
