# CPU (CENTRAL PROCESSING UNIT)
CPU is the microprocessor of our computer system. All major logical decisions (<, >, <=, >=, ! =, =) and calculation like addition, subtraction, multiplication, and division are performed by the CPU. The CPU is considered as the brain of computer because just like in human being the brain works to control all the body parts, similarly in computer all the devices and processes are controlled under CPU. There are three units in computer to perform these actions.

- **CU (Control Unit)**
- **MU (Memory Unit)**
- **ALU (Arithematical & Logical Unit)**
