ABSTRACT

(*Center, font 10, Line space single, spacing before 24, after 12 pt*)

An abstract is a summary of a research article, thesis, review, conference proceeding, or any-depth analysis of a particular subject or discipline. It is often used to help the reader quickly ascertain the paper's purposes. When used, an abstract always appears at the beginning of a manuscript or typescript, acting as the point of entry for any given academic paper or patent application. Abstracting and indexing services for various academic disciplines aim to compile a body of literature for that particular subject. Abstract length varies by discipline and publisher requirements. Abstracts are typically sectioned logically as an overview of what appears in the paper. (simple, single paragraph 100-200 words, Times New Roman 10, space 1)

Keywords: content; formatting; article (*minim three words, maks 9 word*)

Introduction =>*font 14, spacing before 0 pt, after 6 pt, line spacing single*

In the Introduction, the Authors should state the objectives of the work at the end of the introduction section. Before the objective, the Authors should provide an adequate background and a very short literature survey to record the existing solutions/method. to

should be indicated by a reference: only relevant modifications should be described. Do not repeat the details of established methods.

Result and Discussion

Results should be clear and concise. The results should summarize (scientific) findings
